

Electricity doesn't grow on trees, it falls from the sky. Go solar and Save 10-30%!!!!

Everywhere people are talking about the soaring cost of energy. We are using more and more of our income just to keep the lights on and gas in the car....Some people have figured out a way, with ZERO negative environmental impact, to significantly lower their electric bill with little or no cost to them and increase their home value.

Most people that hear about this get excited and want to learn how...So, here is an easy explanation of how it works.

First let me ask you a question: In 1991 gas prices were \$1.14/gal. So, if someone presented you with the idea of putting a gas pump at your house, that they owned, maintained and serviced, and all you had to do was agree to buy your gas from that pump at \$0.91/Gal over the next 20 years...Would you have accepted their offer?

And everyone says... ABSOLUTELY!

Well, it is 2011 and we can offer that same type deal with electricity....At this point, everyone has essentially the same questions:

1. How Much Money Can I Save?
 - a. Every scenario is different and we will work up a custom proposal for you showing the savings (usually \$10-\$20K+)
2. Why Does Your Company Pay for the System?
 - a. The System cost is less than the Tax Advantages + Solar Energy Values of owning the System. This creates profit.
3. What Do I Have To Do To Get Started?
 - a. Get us a copy of your electric bill and fill out a mini application.

Contact me right away and I will review your home by satellite via Google Earth to see if your home qualifies for this incredible offer.

JuiceOnTheRoof.com

Win-Win-Win Situation

YOU:

- ✓ Lower Electricity Cost
- ✓ No Surprise Price Hikes
- ✓ No Large Upfront Cost (as low as ZERO)
- ✓ Increased Home Value
- ✓ No Service or Maintenance
- ✓ Choice of Ownership at End of Agreement

Provider:

- ✓ Earn the Margin Between the Overall Cost of the System and the Solar Energy Value + Tax Advantages

Environment:

- ✓ Use of Solar Energy Releases Zero Greenhouse Gases

Bonus- 1 new job created for every 6th residential system installed
